# Surface - mounting distribution boards and enclosures

## 42 RV

**page 58**

Range of enclosures and distribution boards for surface-mounting systems and applications in the industrial, commercial and residential sectors. The offer includes watertight boards in technopolymer, fibreglass charged polyester, metal and stainless steel, designed for automation, distribution and worksite use (with the type-approved

## 44 CE

**page 59**

versions). The range of enclosures offers watertight and decorative versions up to 72M, watertight emergency versions, and models specifically designed for each country. The range is completed with boxes in technopolymer (for ordinary cut-out, special use and industrial applications), metal, and multifunctional supporting bases.

## Quicker to wire than to describe

The best of practicality.

Four ranges fitted with watertight surface-mounting boards, for automation and distribution, offered in the following typologies of materials:

- termoplastic 44 CEP - IP55;
- glassfiber thermosetting 46 QP with new IP66 and aesthetic transparent doors
- painted metal 46 QM - IP55
- stainless steel 46 QX - IP55.

All products of the range are characterised by a high structural resistance and by a great simplicity of rapidity of installation thanks to the Fast & Easy accessories common to the whole 46 QP, 46 QM and 46 QX Range.

These boards are available with blank or transparent door to offer the maximum flexibility and universality of the uses.

46 QP - ideal for photovoltaic applications

Up to 40% reduction on installation time

Versions with halogen-free material

EN 62208

**Adjustable DIN rails and extractable metal frame**

The DIN rails, adjustable and with quick locking, are supplied preassembled and ready for the automatic insertion into the bracket. The extractable frame is made with completely metallic locking elements. The support brackets for DIN rails and panels are snap fitted on the uprights.

**Front panels with 1/4 turn screws**

The front panels are fitted with unlosable, plumbable, 1/4 turn plastic closing screws. The panels with window are already complete with DIN rail. Moreover the panels of the F&E system can be fitted directly on the internal side walls of the 46 QP boards (apart from size 7 QP boards).

**Accessories for increasingly versatile boards**

The 46QP boards have a wide application field, thanks to the considerable range of accessories such as insulating and metal back-mounting plates, kits for moulded-case switches up to 250 A, pole-fixing kits, double DIN rails, reversible polyester and metal inner doors.

NOTE: the configurations given in the table are ONLY valid if the peak current of the indicated switch (corresponding to the assumed short-circuit current in the installation point) is NOT higher than 17kA, or if the assumed short-circuit current in the delivery point, in line with the main board switch, is NOT greater than 10kA.

Check the thermal power according to the method indicated in the Technical Catalogue.

The kits are fastened by means of uprights. The kit panels are 2-module high.

The MTX 160c and MTX 160 (both 3P and 4P) should be fastened to the DIN rail by means of the specific brackets contained in the GW D8 261 kit. The MTX 250 (both 3P and 4P), on the other hand, require the GW D8 262 kit.

The coupling of the MTX moulded-case devices on the DIN rail, using the relative residual current device, requires the use of the special brackets that can be found in the relative section of the DIN catalogue.

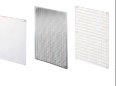

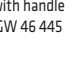

In the case of cable entry from below, you are advised to insert a blank panel above the moulded-case/switch disconnecter kit, so the wires can be pulled more easily.

The MSS switch disconnectors cannot be installed on the same DIN rail with the MTX moulded-case devices because of their different depths.

## SURFACE MOUNTING ENCLOSURES AND DISTRIBUTION BOARDS

### Functionality and practicality in a frame

A wide range of highly specialised surface-mounting distribution boards and enclosures. The 40CD range consists of 4 product lines to satisfy every need in the industrial, commercial and domestic sectors:

- \* 40CDK - IP65 Halogen Free watertight boards with transparent door. Colour Grey RAL 7035. Range from 4 to 72M with removable frame starting from 24M
- \* 40CD - IP55 degree of protection,
- \* 40CD - IP40 decorative enclosures
- \* 40CD - IP40 protected versions without a door

Product lines for photovoltaic applications (40 CDK IP65 and 40 CD IP55)

EN 50267 - 2 - 2

**40 CD - IP55**

Halogen Free watertight enclosures with single transparent door per row already equipped with safety lock. Colour grey RAL 7035. Range from 4 to 36M

**40CD decorative enclosures - IP40**

Halogen Free decorative enclosures and distribution boards available with transparent or blank white push-in door. Safety lock available as accessory. Colour white RAL 9016. Range from 4 to 72M

**40 CD - without door - IP40**

Halogen Free surface enclosures without door. Colour grey RAL 9016. Range from 2 to 36M

### A wide, exhaustive range: a product for any need

The widest selection of flush-mounting distribution boards and enclosures currently available on the market.

Six product lines - including decorative enclosures (from 4 to 36M) - to offer the best solutions for systems in residential and advanced commercial contexts.

A range of enclosures with 2-72 modules (40 CDKi), suitable for a wide variety of applications thanks to the degrees of protection from IP40 to IP55 (48 PTC), and specific versions with metal door.

The range is completed with the innovative Home Networking Enclosure for network cabling.

**40CDi - IP40**  
Decorative enclosures

EN 50267 - 2 - 2

**40CDKi - IP40**

Halogen Free enclosures and distribution boards available with transparent or blank white door. Safety lock available as accessory. Colour white RAL 9016. Range from 4 to 72M with removable frame starting from 24M.

**40CDi - IP40**

Enclosures with metal blank door. Safety lock available as accessory. Equipped with terminal blocks. Colour white RAL 9003. Range from 12 to 48M.

**48PTC - IP55**

Halogen Free watertight enclosures with transparent door. Safety lock available as accessory. Colour gray RAL 7035. Range: 6 and 12M modular with possibility to vertical or horizontal coupling composition.
