

PVC trunking is a type of cable management system made from polyvinyl chloride (PVC), a thermoplastic material. It's used to enclose and protect electrical cables or wiring, keeping them organized and safe from damage, dust, and external influences. PVC trunking is popular due to its durability, lightweight nature, and ease of installation.

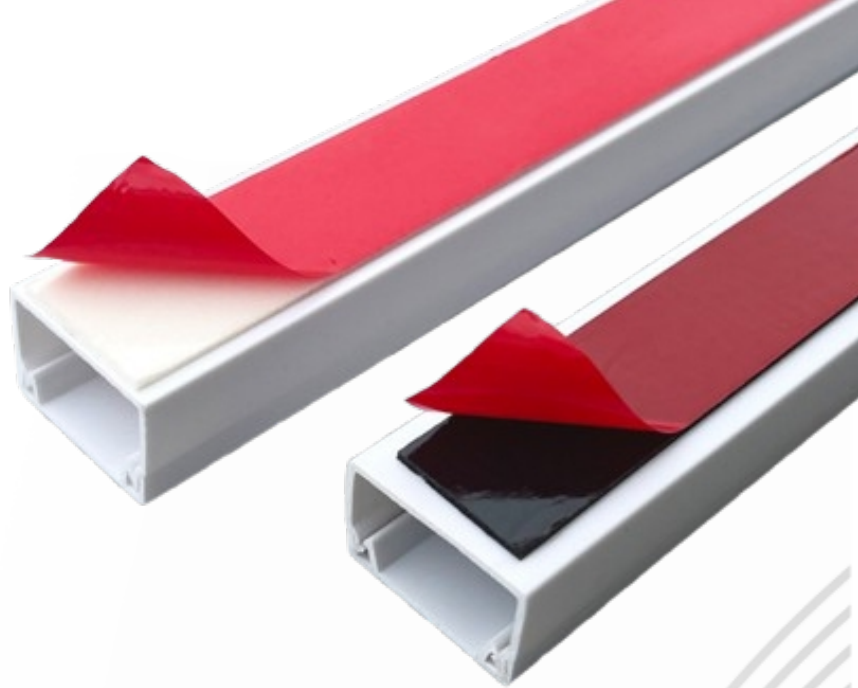

PVC TRUNKING

Relite Trunking can be used in many types of project :

- In House, Residential, Commercial Buildings and Industrial Plants
- Telecommunications and Cable Casing Application
- Wiring in Offices

Relite Non Adhesive PVC Trunking

Dimension (WXH)	Length	Color
16X16mm	2900mm	White
25X16mm	2900mm	White
25x38mm	2900mm	White
38x16mm	2900mm	White
50x50mm	2900mm	White
75x50mm	2900mm	White
75x75mm	2900mm	White
100x50mm	2900mm	White
100x75mm	2900mm	White
100x100mm	2900mm	White

Benefits :

- Self-Extinguished
- Insulation Resistance
- Anti-Corrosion
- Light weight and Easy installation

Relite Adhesive PVC Trunking

Dimension (WXH)	Thickness	Length
16x16mm	1.0mm	2.9mtr
25x16mm	1.0mm	2.9mtr
38x25mm	1.0mm	2.9mtr
