

Misting fans significantly reduce ambient temperatures by dispersing a fine mist that evaporates almost instantly

Compared to traditional air conditioning systems, misting fans consume a fraction of the energy. This translates to significant savings on electricity bills, especially during peak summer months when cooling systems run continuously.

Our fans are not only efficient but also designed for convenience. The easy-to-clean structure ensures that regular upkeep is hassle-free, helping to extend the fan's lifespan and maintain its peak performance.

Used in-Outdoor Seating Areas, Gardens, Plant Foundation places, Sports Arena Turfs, Rooftop Restaurants Etc.

MIST FAN

Features

- Fixed height / Adjustable height
- High-density & high-quality thick metal grill with easy buckle to lock

MODEL: HD-MF65

POWER: 260W

FREQUENCY: 50Hz

SPEED: Three-speed control

MOTOR: High quality copper motor

HEIGHT: Adjustable from 1.7m to 2m

TANK: PP material tank (41L)

ITEM: 26INCH adjustable stand mist fan

VOLTAGE: 220-240V

AIR VOLUME: 145m³/min

MIST CONTROL: adjustable

GRILL: High-quality thick metal grill with easy buckle to lock

HANDLE: Big handle
